Amendments to the Abstract

Please add the following Abstract to this application.

-- An apparatus (20)-such as a television signal receiver includes an emergency alert function which, when activated, provides an alert output to notify users of an emergency event. According to an exemplary embodiment, the apparatus (20)-includes a tuner (22)-operative to tune signals including emergency alert signals capable of activating the emergency alert function. A processor (27)-is operative to detect a condition indicating relocation of the apparatus (20)-after a power interruption to the apparatus (20), and to enable a predetermined output associated with the emergency alert function responsive to detecting the condition.--
